

MARKETLOOPAI

One idea in.
Create, publish, measure, improve.

Content, video, campaigns, and performance — one loop across every platform.

Fasiledes Shimelis · **Founder & CEO** **Hlina Sisay** · **Co-founder**

EAII AI Startup Support Program · Second-round pitch · September 2026

marketloopai.com

PROBLEM → SOLUTION

Marketers do not need another chatbot. They need create → publish → learn.

Fragmented

Writer, editor, scheduler, five ad managers. The first draft still ships.

Blind spend

Campaigns go live. Performance sits in five dashboards. Nobody feeds winners back into the next ad.

Video is stuck

The ad unit of 2026 still costs thousands and weeks. Most SMBs skip it.

CREATE

Idea — Prompt or product → **Generate** — Up to 9 versions → **Rank** — Humanize + score → **Adapt** — Each platform's voice → **Video** — Clip or storyboard

OPERATE · THE DATA COMES BACK IN

Publish — LinkedIn, TikTok, Snapchat, X, Facebook, Instagram → **Run ads** — TikTok, Snapchat, X, Google, Meta Ads — one workspace → **Analyze** — Unified performance across content and campaigns → **Suggest** — Next creative from what actually won

That is the brand: content flows out to every channel. Performance flows back in. Winners become the next brief — not another blank prompt.

MARKET OPPORTUNITY

Short-form video is the ad. SMBs still cannot produce it.

$847M

AI video generator market, 2026

$3.35B

Projected by 2034 · 18.8% CAGR

46%

Text-to-video share of that market

Source: Fortune Business Insights, AI Video Generator Market (2026–2034).

TAM	AI video generation + AI marketing tools businesses already buy as SaaS.
SAM	SMBs, e-commerce, SaaS, agencies who need posts, short video ads, and campaign ops in one place.
SOM	Waitlist → paid beta in 12 months. Founder-led, then agencies as the multiplier.

Why now

- Wan 2.2 (Apache 2.0) made commercial self-hosting possible without per-clip lock-in.
- Algorithms reward native video. Static posts lose reach.
- SMBs already pay $29–$199/mo for point tools. They will pay for a loop that ships and learns.
- Agencies need one workspace to publish, run ads, and see what won — not six logins.

TRACTION · BUSINESS MODEL

Pre-revenue. Product surface is live. Engine is specified.

2026

Founded. Building in public.

Live

marketloopai.com — waitlist, CMS, legal, security.

6 + 5

Publish on 6 socials. Run ads on 5 networks.

The loop

Create → publish → analyze → suggest the next winner.

SaaS plans (published)

Plan	Price / mo	AI videos*	Who it is for
Free	$0	1	Try the loop
Starter	$29	5	Solo creators
Pro · featured	$79	20	Teams + campaigns
Agency	$199	80	Clients + analytics

How we make money

- Subscriptions first. Credits under the hood so video can cost more than a caption.
- Failed GPU jobs refund credits.
- Later: agency seats, extra credit packs, premium video tiers.
- Pro / Agency: campaign management, analytics, winner-based suggestions.
- No paid ads until GPU-seconds prove contribution margin.
- *Site video counts map to credits as models get costlier.

GO-TO-MARKET · COMPETITION

Design partners first. Agencies as the multiplier.

1 Waitlist

Referral codes. Show the full loop on TikTok and LinkedIn — not the model.

2 Partners

10–20 ecom, SaaS, and agency teams. Paid beta on create + campaigns.

3 Product-led

Free → Starter when credits run out. Pro unlocks campaign management.

4 Agencies

One workspace per client: publish, ads, analytics. Highest LTV.

Not another chatbot. Not a scheduler with AI bolted on. The loop includes campaigns and performance.

	Jasper / Copy.ai	Runway / Pika	Schedulers	MarketLoopAI
Ranked creative	No	No	No	Yes
Publish to social	No	No	Yes	Yes · 6 networks
Ad campaign management	No	No	Partial	Yes · 5 ad platforms
Unified analytics	No	No	Partial	Yes
Suggest from winners	No	No	No	Yes
AI video in-product	No	Yes	No	Yes · self-hosted

CORE TEAM AND ADVISORS

Two founders. Complementing skills. Advisors next.

FS

Fasiledes Shimelis

Founder · CEO

Owns product, engineering, and company vision. Shipping the MarketLoopAI web product and the self-hosted Wan 2.2 video architecture.

Available ≥ 3 days/week for the full 4–6 month EAII program.

HS

Hlina Sisay

Co-founder

Owns go-to-market, partnerships, and customer conversations. Turns the waitlist into design partners. Owns how campaigns get published, read, and turned into the next brief.

Available ≥ 3 days/week for the full 4–6 month EAII program.

Advisors we will lock in-program

Growth / performance marketing · AI infrastructure (GPU ops and inference cost). Unpaid. Recruited during EAII.

First hires after beta

Customer success for design partners · Full-stack engineer for worker reliability. Mentorship bridges until those seats are funded.

FINANCIAL PROJECTION · THE ASK

Conservative ramp. Compute before paid acquisition.

	2026 (now)	2027	2028
Stage	Pre-revenue · beta	Paid launch	Scale
Paying accounts (YE)	0–20 design partners	~180	~1,200
Blended ARPU / mo	—	$55	$62
ARR (YE, projected)	$0	~$120k	~$0.9M
Gross margin target	n/a until GPU measured	55%+	65%+

Projections, not bookings. Credit prices freeze only after GPU-seconds are measured. We will not buy ads until contribution margin is positive.

THE ASK

Acceptance into the EAII AI Startup Support Program (4–6 months).

- GPU / cloud compute to run Wan 2.2 in production
- GTM mentorship to convert waitlist → paid partners
- Advisor and customer introductions
- Help hiring the first customer-success seat

Time split · 40% product · 30% GTM · 20% infra · 10% ops

Fasiledes + Hlina: ≥ 3 days/week for the full program.
